Final Comments & Questions

The thesis deals with a topic which deserves a lot of attention from the point of view of theory and, which is even more important, from the point of practice, the actual incorporation into the process of teaching and learning English.

The amount of time and energy the author invested in the preparation of materials and the research itself, as well as her enthusiasm and personal involvement is obvious from the whole work. As already mentioned above, the thesis is detailed, precise, coherent and carefully worked out. In my opinion it is **an excellent piece of academic writing** which I know required great effort on her part.

**Questions:**

What have you gained personally from doing this research?

Were there any obstacles you had to overcome? If so, which were the most difficult ones?
