

Code for work with data

related to the project Automatic detection of sleep spindles by deep learning methods

1) Prevent illegal dissemination of shared data.

- The data will be stored on the hard disk of the disk with encryption enabled (bitlocker, Windows 10), login will be secured by a password.
- The data provided from the MASS group will be deleted at the end of the project, but at latest on Dec 31, 2022.

2) Never share data with others.

3) Never try to identify the measured subjects.

4) Always inform data providers about results of the research.

- Full text of diploma thesis.
- Article information, if it comes out.

5) Always share results with the community.

- Public presentation of the diploma thesis.
- Public presentation of the source code on git-hub.
- To ensure full repeatability of the experiment, it will be needed to request data from the MASS group.

6) Share the results with other researchers who may be affected by the research.

7) Checks data results by reviewer to prevent identifying measured objects.

-It will be done by master's thesis reviewer
